### Introductory note

#### **This introductory note does not form a part of the notice.**

Under the Environmental Permitting (England & Wales) Regulations 2010 (schedule 5, part 1, paragraph 19) a variation may comprise a consolidated permit reflecting the variations and a notice specifying the variations included in that consolidated permit.

Schedule 1 of the notice specifies the conditions that have been varied and schedule 2 comprises a consolidated permit which reflects the variations being made. All the conditions of the permit have been varied and are subject to the right of appeal.

This is a household, commercial and industrial waste transfer station with transfer and treatment located at 82-86 Maxted Close, Hemel Hempstead, Hertfordshire, HP2 7DX. This is a variation to update the existing permit using modern permit conditions, to increase the permitted area, to increase the annual tonnage from 44,999 tonnes per annum to <75,000 tonnes per annum and to increase the range of permitted waste types.

The extended area will be used for new waste processing picking stations and associated operations e.g. storage of recyclables, empty bin storage and waste storage in specified bays/areas.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
