Introductory note

This introductory note does not form a part of the permit

The main features of the permit are as follows.

This permit will allow the operator to receive, store and treat inert and non-hazardous Household, Commercial and Industrial wastes for recovery and disposal. Non hazardous soils with low level hydrocarbon contamination will also be received for bioremediation. The annual throughput shall be less than 100,000 tonnes.

Mixed non-hazardous waste are sorted by hand, mechanical grab and trammel. Wood, plastics, cardboard, metals, WEEE waste and inert wastes are removed for recycling. The residual waste is pre-treated by shredding it to reduce the volume prior to disposal to landfill. The fines are used as landfill cover. Inert wastes are sorted, screened and graded for resale and re-use.

The status log of the permit sets out the permitting history, including any changes to the permit reference number

Reporting of Monitoring results for the period from DD/MM/YYYY to DD/MM/YYYY

Determinant	Result ^[1]	Units	Trigger level	Unit	Reference Period Result	Monitoring Date and Times ^[2]	Uncertainty ^[3]

1. The result given is the maximum value (or the minimum value in the case of a limit that is expressed as a minimum) obtained during the reporting period, expressed in the same terms as the emission limit value. Where the emission limit value is expressed as a range, the result is given as the 'minimum – maximum' measured values.
2. For non-continuous measurements the date and time of the sample that produced the result is given. For continuous measurements the percentage of the process operating time covered by the result is given.
3. The uncertainty associated with the quoted result at the 95% confidence interval, unless otherwise stated.
